

Fiberglass Storage Buildings

Kids really need a lot of “stuff” to keep them busy! Not only that, but it takes an enormous amount of equipment to run a school. You simply cannot store everything within the limited space inside! From outdoor equipment, playground toys, lawn maintenance equipment to sports gear all that “stuff” needs to be stored. The storage shed has to be vandal resistant and sturdy to withstand whatever gets thrown at it-literally!

Modulease FSB is the storage shed that many school boards prefer. Manufactured in Ontario, Modulease FSB's unique design is rugged and strong, making it ideal for the heavy duty use that schools can generate.

Modulease's factory assembles the storage buildings, making them “ready to use” upon delivery. If the desired location of the storage unit changes, the building can be easily relocated by a forklift or tilt-n-load truck.

The fiberglass structure can be placed on any level compacted surface. It can be equipped with a roll-up door or steel man-door with heavy duty lockset if required.

The exterior UV protection coating resists sun damage and more importantly

resists spray paint. Modulease's fiberglass sheds come in a range of sizes with exclusive pricing for school boards. Please contact us for your quote.

Modulease's Fiberglass Modular Buildings

Modulease's prefabricated fiberglass structures are available in a wide range of sizes and designs to suit your specific need. In addition to standard sizes Modulease is proud to specialize in custom designs. From concept to final product Modulease's CAD design and support team provide a total solution to your equipment enclosure needs.

Panel style and specific requests (including doors, windows, electrical, insulation, containment floor and vents) are customizable to suit the exact requirements. The modular design allows your building to grow as your needs grow. RM Products buildings are easy to install by others or our assembly team can be provided.
